

## NFL Ready

I believe that Kenny Hill from Texas A&M is a perfect fit for our team because of these almost similar to most of the big time NFL quarterbacks such as Russell Wilson. I have backed up my findings from their recent game films and have concluded that they have very similar throwing patterns. In the film that I have watched he has a very consistent throwing angle at 60 degrees average per throw. Almost identical to Russell Wilson's 60 degree throwing angle. Another big attribute that is similar is that their average velocity is very close. Kenny Hill's initial velocity is 49.83 f/s. While Russell Wilson has an almost similar velocity at 56.02 f/s.

### Kenny Hill's Data

<b>Feet</b>	30	135	75	45	75	30
<b>Throwing Angle</b>	50	70	70	60	50	60
<b>Velocity</b>	31.32	82.24	61.29	40.9	49.52	33.40

<http://www.youtube.com/watch?v=x4slllygUsmg>

You can see that he is very consistent on how he throws, and depending on how far he throws is how the velocity is going to look.

### Russell Wilson's Data

<b>Feet</b>	150	150	90	60	75
<b>Throwing angle</b>	70	60	70	70	60
<b>Velocity</b>	86.68	74.68	67.15	54.82	52.81

Russell's stats are a little better because he is a top NFL quarterback but Kenny Hill's stats are almost identical with Russell's. In conclusion I believe that Kenny Hill can one day be even better than Russell Wilson one day so we need to draft him before someone else realizes his potential.
